Web Development Application (Revised- Final)

❑ What's your first preference, and give a reason why:

I chose the FullStack Academy because they focus solely on JavaScript so their curriculum seems straightforward and precise.

Option 1: FullStack Academy- Focused on Full Stack JavaScript
Application Link: https://www.fullstackacademy.com/apply
Option 2: General Assembly- Focused on HTML, CSS, JavaScript, UX & Visual Design, Android, iOS, Digital Marketing, Data Analytics & Science, Product Management
Application Link: https://generalassemb.ly/applications/new/front-end-web-development
Option 3: NY Code & Design Academy- Focused on Web Development: HTML, CSS, JavaScript, Node.js, Express.js, React.js, Ruby, Ruby on Rails, UX/UX
Application Link: https://nycda.com/apply?course_id=4&loc=1

❑ Tell me a little about yourself

My background is in fashion & graphic design, which has enhanced my skill for converting conceptual, trendy ideas into relatable, versatile designs. Now, I'm integrating my design mindset into web development. It's exciting to adapt and find new ways to challenge my creativity, which helps me stay resilient in the transition.

❑ Describe your technical background to date (even if it's only using a computer on a day-to-day basis)

I have a technical background in the Bridge to Tech Program that teaches HTML, CSS, some JavaScript. I also have a background in Microsoft Office Suite, Adobe PhotoShop, Illustrator, InDesign,, Google Apps, IOS, MAC, Android, and PC.

❑ Please tell us about an application that you use every day and why it's important to you

An app I use everyday is Pinterest. It is important to me due to the fact that I am a person looking for new trends and concepts to inspire my creativity. There I can always find new intriguing arts and also share and inspire with my own creative arts.

❑ What inspired you to pursue an education in development?

I am inspired to make this transition because I know it will compliment the background skills I already possess and also an education in development will open many doors and opportunities for me to gain a more successful and passionate career and lifestyle.

❑ Describe a complex problem you faced and how you solved it.

I am enrolled in the Bridge to Tech Program learning the basics in Web Development in a class of 20. There we split in teams of four to create a script that would run a Blackjack program. I took the initiative of being the Project Manager and the debugger, making sure we were on deadline and everyone was assigned a task that would best suit their skills and experience. In the end when we had to present our final project and the game worked with a few kinks. As a

result we increased our task management skills, and enhanced skills in JavaScript from learning from each other.

- ❏ Questions about the program

Question 1: I was researching your site and I did not come across the accessibility of laptops on campus. Do you provide on-campus loans for laptops or provide computers for class?

Question 2: What would you say is the best attribute for students receiving an education at this academy?

===
